

The Air 1 radio station 90.1 is the only station I listen to. They provide clean wholesome music for my children to listen to. We play this station in the car constantly. Without this station we would have to listen to talk radio or stations that play songs with words "beeped out". (By the way the meaning of those words comes through even though the words are beeped.) Air 1 is the only station I feel My children can listen to and not be exposed to vulgar content and language. The community is in desperate need of clean family radio and Air 1 provides just that.
